August 31, 2006 – FOR IMMEDIATE RELEASE

Stealth Acoustics Model 255R: Rack mountable, mono, subwoofer power amplifier

Mount Vernon, WA – Stealth Acoustics announced today the immediate availability of its model 255R rack mountable, mono, subwoofer power amplifier. The 255R incorporates all of the features found in a conventional powered subwoofer and puts them in a package that can be installed in a standard 19" equipment rack, or stacked with other non-rack mounted stereo equipment. With a full complement of input and output options it will adapt to any installation interface requirement. The 255R has been developed to power the Stealth Acoustics B1630 invisible in-wall subwoofer panels, but can be used to power any 250 watt subwoofer system.

Functions and Features

Removable Rack Mounts – (2) RU spaces
Variable low pass filter - 50 to 150Hz
Auto on/standby function
High level inputs and outputs
Line level inputs and outputs
Balanced line input and outputs
Bypass switch for low pass filter

DC protected – fixed high pass filter
Standby LED (red) blue when active
Output monitor LED's
110v and 220v input voltages
Fan cooled – 8 speed stages
Phase control

Specifications

Mono output power: 250 watts @ 8ohms < 0.05 THD
350 watts @ 4ohms < 0.05 THD

THD: <0.05 @ 1 watt 4ohms/100Hz

S/N: 86db Below rated output.

Crossover Section: High Pass Filter: 18Hz/30db / octave (fixed)

Low Pass Filter: 50Hz – 150Hz / 41db / octave (variable)

The Stealth model 255R is available through Stealth Acoustics' network of custom electronics installers and value added resellers. Manufacturers suggested MAP is \$500.00 per unit. Stealth Acoustics will be demonstrating the 255R at CEDIA EXPO in Denver, Booth #511.
